## Clear capital allocation priorities in place

Reinvest in the business

- Fund maintenance to sustain the "machine" and organic growth opportunities that exceed required returns
- Expect FY 2019 capex of $\$ 130$ - $\$ 150 \mathrm{M}$

Maintain financial flexibility

## Maintain annual dividend and periodically review

## Grow the

business through M\&A

## Consider additional

shareholder friendly activities

- Current leverage ratio = 1.6x; target leverage ratio $2.0-2.5 x$
- Willing to temporarily exceed current ratio if compelling growth opportunity emerges and path back to target is clear
- Current quarterly dividend of $\$ 0.44$ and $\$ 0.65$ for Class A and Class B, respectively
- Sustain an attractive dividend and reward current shareholders for confidence in GEF
- Capitalize on external growth opportunities that align close to GEF's core
- Advance opportunistic capital options if hurdle rates are met and justified by returns
- Consider progressive or special dividend options
- Consider share buybacks - current 4.7M share authorization in place

## Significant debt reduction over last three years

~27\% reduction in Net Debt ${ }^{1}$ since early 2016

## Industry leading balance sheet

Financial flexibility to maximize value creation
(1) Net debt is defined as total debt less cash and cash equivalent

However because the Company does not calculate net income by segment, this table calculates EBITDA by segnent with reference to operating profit (loss) by segment, which as demonstrated in the table of Consolidated EBITDA, is another method to achieve the same result. See the
